7.10.2024 SEBERANG PERAI SWSI REPORT 1: 85% SUPPLY RECOVERY

- **Water supply services have recovered for an estimated 100,300 of 118,000 consumers in Seberang Perai Tengah (SPT) and Seberang Perai Selatan (SPS).**
- **PBAPP personnel expediting pipeline de-airing works at various locations in SPT and SPS to fully normalise water supply for consumers in higher ground and end-of-line (EoL) neighbourhoods.**

PENANG, Monday, 7.10.2024, 11.30am: PBAPP has normalised water supply services for 85% of consumers in Seberang Perai following recent water supply interruptions from 4.10.2024 to 6.10.2024.

As at 10.00am today, water supply services have been restored to an estimated 100,300 of the 118,000 consumers in Seberang Perai Tengah (SPT) and Seberang Perai Selatan (SPS).

The 2 repaired sections of a major 1.2m pipeline treated water pipeline at Jalan Pengkalan Tambang and Politeknik Permatang Pauh are fully functional.

PBAPP has re-commenced optimal treated water production and treated water pumping works at the Sungai Dua Water Treatment Plant.

However, consumers in the following neighbourhoods have complained that they do not have water supply:

- Perkampungan Juru
- Taman Seruling Emas
- Sungai Duri Indah
- Taman Widuri
- Taman Kesumba
- Jalan Sungai Duri
- Persiaran Jawi Golf Resort
- Tasek Junjong

Accordingly, PBAPP personnel have been deployed to address specific issues in each neighbourhood. Our work teams are also expediting pipeline de-airing works at various locations in SPT and SPS to fully restore water supply as soon as possible.

We seek the kind patience and understanding of all affected consumers. PBAPP will continue to post recovery status updates on FB.

Thank You.
